MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDUSTRY STRUCTURE & DEVELOPMENT

The Indian Textile Industry has the potential to grow five fold over the next ten years on the back of growing demand for man made fibres. Due to stability in crude oil prices, the man made fibre industry is likely to see a growth rate of five to seven percent. Manufacturers of readymade apparels, home textiles and technical textiles are expected to increase the usage of synthetic fibres during 2015-16. A supportive policy regime and the absolute commitment of private enterprise add strength to Indian prospects.

The year 2014-15 saw a decline in demand for most man-made fibres due to decline in prices of cotton yarn. This year also saw a rise in labour cost and power cost and thus offsetting the lower cost of raw material.

Technology Upgradation Fund Schemes (TUFS) for providing maximum subsidy in interest rates on loans to Textile Industry has been the flagship programme of government for textile industry. It shall continue in current year.

OPPORTUNITY AND THREATS

Due to rising labour and production costs, China is losing its place as low cost production centre of the world. The prospects for increase in demand for Indian products are high not only from China but from other countries as well.

There is also improvement in demand for textile products in domestic market which is expected to grow. Increased local sourcing by global brands and retailers in India offer avenues to textile industry to grow.

Increase in power costs, higher transaction costs and high cost of labour may pose a threat to progress of textile industry.

SEGMENTAL REVIEW AND ANALYSIS

At present, the Company has only one reportable segment, and that is synthetic yarn. The financial performance of our Company is steadily improving. In the past year, we have focused on energy conservation measures and modernisation of our production processes. This has helped us improve quality and increase our production and has enabled us to meet our commitments to our customers more efficiently.

The problem of lack of skilled and unskilled labour is under control. Increased automation technologies in our production process have reduced dependence on labour to some extent.

Having in-house power generation has helped us to some extent to contain our power costs.

RISKS AND CONCERNS

Fluctuations in foreign exchange affect long term booking of export orders. Countries like Pakistan, Bangladesh, Sri Lanka and Vietnam having duty free access are able to control larger share of export market than India. The currencies of most third world countries have depreciated more than the Indian Rupee and as such competitiveness of countries, such as Pakistan and Bangladesh is a growing concern. Further, High labour and energy costs and continued inflation are a cause for concern.

OUTLOOK

Manmade fibres have evolved and are more breathable. Also, being more durable and reasonably priced are gradually increasingly replacing cotton in many areas.

The global and domestic man made fibre market will continue to grow. The main drivers are increasing population, economic growth, consumer aspirations, new applications, & infrastructure projects.

Our Company has competitive edge in terms of quality and ability to be flexible on the face of changing requirements of the market.

INTERNAL CONTROL SYSTEM AND ADEQUACY

The Company has in place adequate internal control systems and procedures commensurate with the size and nature of its business. Internal Audit is conducted by independent Chartered Accountants, on a quarterly basis. Independence of the Internal Audit and compliance function is ensured by the direct reporting of the internal audits to the Audit Committee of the Board. The Audit Committee periodically reviews internal control systems with help of the internal and statutory auditors and reports to the Board on its adequacy.

FINANCIAL PERFORMANCE

The report of the Board of Directors may be referred to for financial performance.

HUMAN RESOURCES

The employees on roll in the Company as on 31st March 2015 were 2064.

The core of our corporate philosophy is centered on our employees. We consider people as our biggest assets and believe that the strength of an organisation is its employees as a dedicated, enlightened and contented work force is the life line for any business to achieve its goals. The focus of the Company is that rewards and recognition should commensurate with performance and employees should have opportunity to develop and grow for future responsibilities in terms of professional skills as well as business skills.

Industrial relations remained normal at all levels. Customized training programs that enhance both personal as well as career growth are conducted on a continuing basis.

CAUTIONARY STATEMENT

Statements in this Management Discussions and Analysis Report describing the Company objectives, projections, estimates, expectations or predictions may be 'forward looking statements' within the meaning of applicable security laws or regulations. These statements are based on reasonable assumptions and expectations of future events. Actual results could however, differ materially from those expressed or implied. Factors that could make a difference to the Company's operations include market price both domestic and overseas availability and cost of raw materials, change in Government regulations and tax structure, economic conditions affecting demand / supplies and other factors over which the Company does not have any control. The Company takes no responsibility for any consequence of decisions made based on such statements and holds no obligation to update these in future.
